

# CASPR PRO

---

**CASPR PRO** units are suited for all indoor areas where people live or work. Once installed and turned on, CASPR provides continuous and automated air and surface protection for your entire facility. CASPR units come in a variety of sizes and typically a combination of units are used to cover a space.

Combat COVID with CASPR's Continuous Air & Surface Pathogen Reduction Technology. CASPR was able to inactivate 99.99% of the SARS-COV2 virus within 24 hours. Once CASPR reduces pathogens in your air and on your surfaces, it works continuously to keep them down.

**CASPR 400**  
**CASPR 1000**  
**CASPR 2500**  
**CASPR 5000**

The CASPR technology has a kill rate of up to **99.96%** on surfaces.
